

PALO SECO AGRICULTURAL ENTERPRISES LIMITED
CORPORATE HEALTH, SAFETY & ENVIRONMENTAL
POLICY STATEMENT

On the basis of sound management principles, **Palo Seco Agricultural Enterprises Limited (PSAEL)** is dedicated to the safeguarding of its employees and other stakeholders, while preserving the environment from the day to day activities undertaken by the company. We at PSAEL view our Health, Safety and Environmental (HSE) performances as a core part of our management system, which is entrenched on the belief that we must provide a safe place and system of work for our employees, while everything we do must not negatively affect nor infringe upon any stakeholder or the environment.

PSAEL implemented and continues to implement its HSE policies through a solid Health, Safety and Environmental Management System (HSEMS) that is both measurable and meets the standard of international best practices. It is duly recognised that the implementation of this HSEMS placed us in a binding agreement with our stakeholders to preserve their wellbeing and to improve the quality of our services and deliverables while simultaneously preserving the environment through firm management policy directives.

The management of PSAEL is reiterating its commitment to the successful implementation and continuous improvement of our HSEMS both from an individual level and collectively as an organisation with a single objective and a common goal.

Our policies and procedures will continue to be expressly communicated to all stakeholders with a single mission, that is, to have all personnel aware and appraised of our expectations and strong commitment to the role of HSE within the workplace.

Our commitment is demonstrated by:

- Compliance with the Trinidad and Tobago Occupational Safety and Health (OSH) Act of 2004, as amended and all other applicable national and international laws, regulations and best practices, along with relevant standards and guidelines.
- Review of our HSEMS to identify and correct shortcomings for continuous improvement.
- Engaging all stakeholders in a holistic manner to foster sound relationships.
- Provide training to all employees, as required, that will mitigate the risk to which they are exposed.
- Conducting risk assessments and implementing industry best practices, policies and procedures to reduce the risk in the organisation to as low as reasonably practicable.

It is expected that all stakeholders will comply fully with the terms and conditions stipulated within this policy; as management understand that no activity is so important that it cannot be done in a safe, healthy, secure and environmentally responsible manner.

Mr Danny Maharaj
Chief Executive Officer
Palo Seco Agricultural Enterprises Limited
